KNX Panel Build & Programming

Subcontract services for KNX installers

KNX Partner #147787

Johan Aludden

London-based — UK-wide service

aldercape.co.uk

07956 140054

I offer KNX panel assembly and ETS6 programming as a subcontract service to installers across the UK. You specify the board — I build it, program it, and deliver it ready to connect on site. You stay on site doing what you do best.

Services & Pricing

Service	Rate	Minimum Charge	Notes
Panel Build	£30–35 per module	£200	Standard modules
Panel Build — Complex Modules	£45–50 per module	£200	Gateways, DALI, IP interfaces
ETS6 Programming	£20–25 per module	£150	Single download included
Build + Programming (bundled)	10% discount on total	£300	Recommended

* Complex module rate applies to: gateways, IP routers, DALI controllers, visualisation servers.

What's Included

Panel Build includes:

DIN rail cutting & module mounting
Cable ferrule crimping & termination
Professional cable & module labelling
Continuity check before dispatch
Secure packaging for delivery

Programming includes:

ETS6 project setup to your spec
Group address configuration
Single download to all modules
ETS project file provided on completion
Basic functional test

Terms

Materials

Client supplies all KNX modules and components. Deliver to my address or arrange direct delivery.

Turnaround

Typically 3–5 working days from receipt of materials and confirmed spec. Quoted per job.

Delivery

Panels dispatched via FedEx/courier or hand delivered (London). Delivery cost billed at cost.

Note: Revisions due to changes in spec after programming has begun are billed at £45/hr. Faults resulting from incorrect wiring on site are not covered under this service.

To request a quote, send your board spec and module list to aldercape.co.uk or call 07956 140054

Happy to discuss scope on a quick call before you commit.
